

Deploy Your SMB Network From Intake to Order — in Days

The only AI-native platform giving SMB teams end-to-end control over network procurement — from requirement discovery through visual BOM and BAFO-ready proposals. Every product, price, and design decision is unified in one workspace, eliminating manual coordination between sales, ops, and vendors.

TODAY'S PROCESS — FRAGMENTED & MANUAL

- **Spreadsheets** only capture one project at a time, creating version chaos
- **Vendors** quote independently, missing cross-SKU optimization
- **Sales engineers** build BOMs manually — slow and error-prone
- **No single source of truth** across catalog, contracts & inventory

SECUREOFFICE DIFFERENCE — AI-NATIVE PLATFORM

- **Business intake** — deterministic sizing from a single questionnaire
- **Auto-generated BOM** from unified CDW + managed services catalog
- **3D network diagram** for instant customer-facing design confidence
- **Single source of truth** across products, quotes, orders & lifecycle

OUTCOMES

Faster Proposals

Generate BAFO-ready commercial proposals from a single intake session, not days of back-and-forth.

Design Confidence

Real-time 3D topology diagram previews let customers visualize their network before a single order is placed.

Smarter BOM

AI-driven product selection and default discount pricing across 14+ line-item categories in one pass.

Aligned Execution

Sales, ops, and vendors stay synchronized from quote acceptance through fulfillment and lifecycle tracking.

END-TO-END WORKFLOW

PHASE 1

1

Business Intake

Capture office type, headcount, rooms & connectivity needs via guided intake form.

PHASE 2

2

BOM Generation

Deterministic sizing engine maps inputs to routers, APs, phones, and managed services.

PHASE 3

3

Network Design

Visual topology diagram renders automatically; customer can review and approve the design.

PHASE 4

4

Proposal & Quote

BAFO pricing applied, proposal generated, accepted, and converted to a binding quote.

PHASE 5

5

Order & Lifecycle

Order placed, fulfillment tracked, and contracts & subscriptions managed end-to-end.

Platform-Led Commercial Model

Subscription-based access to the full Secure AI Office stack — intake, BOM, design, proposal, and order management. No per-seat upcharges on catalog lookups. Pricing scales with your active project volume.

- ✓ Unified catalog: routers, phones, managed services, and connectivity
- ✓ Default + incremental discount pricing model built-in
- ✓ CLM-ready contract handoff — no manual export
- ✓ Vendor marketplace: onboard and manage channel partners
